(Attached, Below, Here is) a link to CFAC's draft Phase 1 Data Summary Report. We are sharing this link for those who are interested in the information we have received. Please note this is in draft form while the EPA and MT DEQ review this document. If you have any comments please feel free to email them to the EPA, MT DEQ or CFAC.

What do you think of the above?

Roger,

Yes, I can add a short bit to the top of that section with a link to the site linked below. Can you provide a few words of description for the link—where it will be going and why we are providing it?

I can't guarantee that the page will be republished at the same time as the press release. Under a new edict from HQ I cannot publish pages anymore, since I am not a fed. I can make the update and ask Libby to publish as closely as possible to the time of the press release. Do we know when that time will be?

Bill

Bill,

Robert is out this week and on vacation next week. Mike Cirian called me this afternoon stating that the PRP's contractor I going to be issuing a press release about the availability of documents that can be accessed via a link. I was hoping that we could add some language to the top of the Topics in Focus section of the Anaconda Aluminum Company Columbia Falls Reduction Plant with the link to coincide with the press release. Is this something that you can help with to ensure the webpage gets updated at the same time that the press release is issued?

Thanks for providing your address.

The website we are planning to use to post the documents is below:

www.rouxinc.com/cfac-phase-l-site-characterization-data-summary-report

The website link will not be active until the date of the press release.

Hi Mike,

Here is the link to our web site for reference in the press release. What I will need from you is the link for us to put into our website for the Draft Data summary report and SLERA.

Please copy both me and Roger Hoogerheide. And also remember to add Roger to our invite lists. He is my back up for this project.

Thanks
