IV. COMMENTS

In Sept. of 1987, a final incident report was filed by Mark Mauck of Emergency Response. The incident involved burning tires, which were in the brush concealed by undergrowth. The tires were covered by dirt and the fire was put out. No dumping is allowed or accepted at the site.

IDEM/OSHWM Shelby Gravel Inc.

(317) 736-9085

Subject Discussed Shelby Gravel Inc.

Summary

In Sept. of 1987 there was a fire involving tires on site. Emergency Response Branch filed an incident report.

Action Required

This is purely a gravel company, no dumping of any kind is allowed on site.

Details

The gravel pit is not filled and they accept no waste materials including construction materials.

The land was previously owned by Russell Stott who is now deceased. He was a local judge in the area and had a house on the property.

Shelby Gravel Inc. has been in operation since 1978.

NOTES

STAFF was notified of the burning tires and barrels on the property. When STAFF arrived, some smoldering continued and a few well rusted barrels were in sight. None looked as if they had held or could hold any product for some time. STAFF could neither estimate the number of tires or estimate the barrels that also could remain. This was due to both having been buried under the dirt and brush. All of the products were pushed into the recess and buried there. STAFF is informing all areas w/in IDEM for any future reference and any possible investigation into illegal burying of these products. No run off could be observed.

No further action is Anticipated by this office.

P.O. Box 6015
Indianapolis, IN 46206-6015

Re: Incident #8709014

Dear Mr. Mauck:

I am writing in response to a letter which I received from Mr. Robert M. Moran. He instructed me to send a narrative to you concerning an incident which occurred at our Edinburgh plant.

Shelby Gravel recently purchased the ground in question and we were in the process of clearing brush and leveling ground. I hired Dingman Excavating to assist us with their track dozer. Around noon on Sept. 6, 1987, Mr. Dingman was operating their dozer and while moving a brushpile he encountered several nests of bees in the pile. Mr Dingman decided to set fire to the brushpile in order to get rid of the bees. He was not aware of the fact that there were tires in the brushpile as the undergrowth concealed the tires.

Apparently the former owner of the ground, Russell Stott, had allowed the tires to be dumped there several years ago. I would estimate 200-300 tires were there.

Mr. Dingman said that he had cleared an area around the perimeter of the brushpile to keep the fire from spreading. He then lit the fire and was caught by surprise when he realized that there was more than just brush in the pile. Mr. Dingman then started pushing dirt upon the fire in an effort to extinguish it.

Boyd Mitchell, an employee of Shelby Gravel who lives nearby, saw the smoke and drove over to investigate. When he realized what had happened he got in a front-end loader owned by Shelby Gravel, and assisted Mr. Dingman in extinguishing the fire.

To the best of my knowledge there was no spill of any kind. There were a few (2-5 ?) old oil barrels in the area but I believe that they were already empty.

If you have any further questions or if I may be of assistance please contact me at the Edinburgh office.

Sincerely,

Gregg A. Hebbe
Manager
