Subject: Discuss TDU located at CWMNW
Attachments: 2018 10 23 ORU-2 Information from CWMNW.pdf
Location: R10Sea-ConfLineMM-2[redacted]

Start: 11/28/2018 7:30:00 PM
End: 11/28/2018 8:30:00 PM
Show Time As: Tentative

Agenda: Informational Meeting

ODEQ will provide information to headquarters for their further review of this topic. What are the current planned path forward with respect to how ODEQ plans on addressing the adverse comments they received on the permit mod (doesn't need to be definitive - tentative info will suffice).

There is a two pager from cwm that summarized what cwm tentatively agreed to do, attached. That could be some basis for the discussion.

Also some basic questions like whether the second oru is currently operating, whether CWMNW replaced the flare that previously serviced the first oru with the new thermal oxidizer, etc.
