Hi all... been talking to HQ folks, and I think we should take the music down. If it will take a little while to fix the code to leave in the other sounds, then let's go back to what you initially did, David Schwenk. Thanks!

David,
Other sound files for sound effects need the music.js file. The RCG.js file could be modified to just not play the "MainMusic" (yoshidsunderground.mp3) since at this time we don't have another music file to swap it out with. This would allow the other sound effects to still play. All we need to do is comment out 4 lines of code in the rcg.js file. Could you send over the rcg.js file.

thanks

The JavaScript file that controls the music source is music.js. The audio file is yoshidsunderground.mp3. I have attached all three items to this email.

If a different audio file is provided, I can just change music.js to pull in whatever the new MP3 or MIDI file name is.

David, please contact David Y with a copy of that file and then he'll send you an updated version that we can deploy IF we need to do so – thanks.

Bill,
If someone can contact me about getting the deployed copy of the rcg.js I can updated it really quick and send it back to be delployed.

David

Bill,
I will just need to modify the rcg.js file in the js folder of the Recycle City application to stop the music from playing. I would also suggest removing the music file yoshidsunderground.mp3 from the music folder.
If can get the rcg.js file I can have it back to you very quickly so as to not play any backbground music.

David
