RECORD OF COMMUNICATION	☒ PHONE CALL ☐ DISCUSSION ☐ FIELD TRIP ☐ CONFERENCE ☐ OTHER (SPECIFY) (Record of item checked above)
TO: Paul Meiburger MDNR	FROM: David Doyle ARWM/AWCM — DATE 2/5/82 — TIME 12:45

SUBJECT: Litton Industries, Springfield, Mo. Groundwater Monitoring Plan

SUMMARY OF COMMUNICATION

I told Paul that I had quickly reviewed the groundwater monitoring plan submitted to MDNR by Litton Industries. Asked Paul if wells that MDNR found organics in were the same ones that Litton plans to use in groundwater monitoring. Said that the wells they found organics in are shallow (≈20 ft). Litton plans to sample new wells drilled ≈125-150 ft. Paul agreed that Litton's G.W. plan may not be addressing the upper-most aquifer.

I asked Paul where the organics were coming from. He said that some may be coming from Litton's WWTP and some from the old Fulbright Landfill. I told Paul that I believe that Litton probably should have submitted an alternate G.W. plan back last November, 1981.

Paul said that facility will be hooked up to city sanitary system sometime this month.
