Subject: RE: PFAS Lab Test Methods - Request Support for Review
Attachments: SESD Review PFAS Analysis and Methods Development Plan.docx

Becky/Linda

SESD has completed the review of Chemours "PFAS Non-Targeted Analysis and Methods Development Plan". Comments included request for clarity and recommendations to improve the sampling plan and analytical method. Please also note that ***critical information has been redacted as proprietary*** from the Eurofins, PFAS in Aqueous Samples by Method 537 version 1.1 using LC/MS/MS and without that information it is hard to weigh in on the completeness of those critical step.

I have sent this memorandum in word format so that Linda is able to compile all comments received.

Linda,

I looked at all of these and had comments. I will look at Geosyntec tomorrow.

Mark

Subject: FW: PFAS Lab Test Methods - Request Support for Review

We are trying to locate a referenced Geosyntec Report from December 2018 and forward it. Several of us cannot find it in our emails. Will forward upon receipt.

Additionally, Chemours has indicated that their chemist Dr. Lam has been in coordination with Dr. Strynar in developing the draft test method and workplan, and that Mark can talk with Dr. Lam if there are questions.

Is there time for Mark to help with this review? Other thoughts?

Thank you,
Linda

Subject: PFAS Lab Test Methods - Request Support for Review

As part of the Consent Order, Chemours has provided the attached test methods and workplan. Wondering if EPA can provide support in reviewing these? Thought I'd reach out at the same time to both of you.

Linda
