Attachments: Response_Draft_18-000-1151_2017-11-01 Templatefor Sen Burr GenX Response -AM RE scc mjd am 11-16-17 update.docx; Burr incoming 18-000-1151.pdf

Hi Mark,

OPPT has been working to coordinate a draft response to a letter from Sen. Burr, which is attached here. It's possible that Tala Henry from our Risk Assessment Division may be fielding this part of the question, since it ties together ORD's work with RAD's risk assessment, but I also wanted to see if you had time for a brief phone call on Monday to discuss what might be appropriate for me to add in a sentence or 2 about ORD's work on perfluoros. I am available any time other than 11am-12pm on Monday, and I think it should only last a few minutes.

Thanks,

Adam Moyer

Subject: PFAS activity of ORD? FW: NEW CORRESPONDENCE: AX-18-000-0702

Tala/Toni,
See the request Hans is passing along from Jeff that our response to the governor of North Carolina mention the work that ORD is leading across the agency. Can you give me a sentence? Attached is the latest version of the response as well as the incoming to refresh your memory.

We are waiting on region 4 to give us additional info in order to respond on the water permit questions of the incoming.

Need asap. Thanks.

--Sheila

Sheila,

Jeff has asked for a draft by Monday at that latest. He has also asked that the draft include a mention of the work that ORD is leading across the agency to look at PFAS chemicals in general and as "emerging contaminants" for water and that the letter also indicate that the information that is developed as a result of that cross agency work will inform OPPTs as we prioritize chemicals for risk evaluation. Can you please add these concepts to the letter, hopefully, in a more articulate manner? Let me know if any questions.

Thanks,
Hans

We're still waiting for R4's response. It apparently was sent from Carol Kemker to their Congressional Relations person on Monday, but we have not gotten yet. Yesterday afternoon Ken Mitchell said they're on it and hope to have it to us soon – hopefully that means we can get the draft to Jeff today, though I'm not sure when Maria will actually receive the language from R4.

Sheila,

Do we have what we need from R4? Will CCD be able to send a draft forward today? Jeff is anxious to see the draft and get this response moving up the chain.

Thanks,

Hans

I put in an extension request previously, to extend the due date to November 22nd. This request is still awaiting OEX approval. I sent the approver an email this morning and expect it to be approved soon. Tentatively, the due date is **November 22nd**. Do you anticipate needing additional time beyond November 22nd?

Hi Sheila,

Can CCD please develop a draft to share what we are currently doing to address PFAS chemicals (PFOA and replacements) along the lines of the document Toni developed for the OCSPP request a few weeks ago? OPPT IO can add content on legacy uses to complete the response. We will need to share with OD and perhaps Nancy as well before responding.

Thanks,
Hans

Subject: RE: NEW CORRESPONDENCE: AX-18-000-0702

Hi Aresia,
I think the rule she is reacting to is the risk evaluation rule. The only rules Nancy has been involved in that have been issued are the framework rules. The IO should probably answer this one.
