Subject: CASQA Panel No. 1 - Wednesday October 17, 8:30am to 10:15am, Rm 5

Tom and Drew:
I spoke with David Smith this am to get some more clarity on how he would like to see the CASQA Panel No. 1 go. Overall, you each have a lot of license to use as you see fit. Specifically, here is some guidance for your 10 min primers:

1. Drew: Focus on the local program perspective. Considering the findings from the Workshop, what can and should the local programs change to get a higher return on investment for the stormwater program. David said, 'if you are king, what would you change'
2. Tom: Focus on the permitting authority perspective – what can the permitting authority do to refine/change the permit to improve program performance.

David will start with the workshop goals and the big picture description of the Workshop, followed by Drew then Tom. Should be at about 35 mins at this point all preceded by a 5 min intro from me.

The bulk of the session is (55 mins of a total 90 mins) should be a dialogue with the audience. I will help prime that process with the following broad questions:

1. What did we miss?
2. What do you want out of this process?
3. What is not working or just broken?
4. What is working and should be pushed along?

The idea here is to vet the content we came up with in the Workshop with the people in the room, and see if there are any additional worthy ideas.

I will arrive Tuesday AM at the Confernece if you guys want to get together sometime during the day to coordinate further, or let me know if you would like a call prior to and I can set that up.

Thanks
