[redacted]

4/27/12 Paul Kennedy

Compliance Order from EPA for nitrogen

micro C for additional carbon source

- 1/3 of NH_3 loading is from metalor

could always ~~nitrify~~ nitrification w/o problem, but now w/ anoxic zone, they can't

Going out of nitrification,

Also had cyanide problem

TKN 7430 mg/L
Nitrate 1241 mg/L
nitrite 166.4 mg/L
8500 total N

Submitters local limits to EPA & state
didn't include Metalor, bc they had been able to nitrify

will have to develop local limit for metalor
looking to get back to full nitrification by sunday → anoxic
if everything goes well, looking at starting feed next monday - wed

+, complete mix +, cont. to nitrify
