LEGEND

- Groundwater Sample Point
- Temporary Well
- Monitoring Well
- Plume C LUC
- Area Exceeding MCL of 5 µg/L for Carbon Tetrachloride (Plume C)
- Site Boundary
- 220 Former Building

Approximate Utilities
- Natural Gas
- Sanitary Sewer
- Telephone
- Water

0 30 60 Feet

NOTES:
1. Remediation goal for carbon tetrachloride is 3,200 µg/L.
2. J = Estimated Concentration
3. < = Chemical not detected above the method detection limit.
4. Bold type indicates the chemical was detected.
5. Shading indicates a detected concentration above the remediation goal.
6. *Italicized values represent detection limits above screening levels.*
7. µg/L = micrograms per liter
8. MCL = Maximum Contaminant Level
