TIME: 1600

SUBJECT: Perfection Mfg, St. Louis

SUMMARY OF COMMUNICATION

Steve Wilner (412/562-5016) called from the parent company in Pittsburg, PA. Allegheny Ludlum bought Perfection Mfg in Dec and they now are trying to figure out the status of Perfection. 60 drums of haz waste was accumulated during the change of ownership but that quantity is being reduced gradually now by shipment to a haz waste landfill (so he says). He thinks they will not be a TSDF as soon as the 60 drums are removed and also that they would be a small qty gen. He wants you to call Mon for further clarification.

3/20 - 2:40
Talked to Mr. Wilner. Said that Allegheny Ludlum purchased Perfection in Dec. 1980. Had new management team at Co. Doesn't know why facility notified in 8/80 as generator and TSDF. They are a small quantity generator and have accumulated over 2,000 lbs of caustic cleaning sludge and paint sludges on the plant site. Said that Perfection doesn't plan to be TSDF in future. Will send us response to LDJ's letter and request to remove facility from system.
