Subject: Re: FOR REVIEW: PFAS Statement

The wells statement was pulled from the TCEQ release. We could remove that sentence since the link to TCEQ is included and they are the ones giving the guidance. We would want questions to go to them on that at this point I would think. Thoughts?

Thanks!

>> Please find attached an updated statement that reflects input from OEM and from the call with Region 6 this afternoon. David, I was hoping you could work with Ronnie and his team on the review of the document, but I am more than happy to work directly with him if that would be better/easier for you at this point. Just let me know. HQ folks please work with your teams to provide any input your office may have.
