Subject: RE: Published USGS report Groundwater model simulations

Thank you Rob. It is interesting that the report is just being acknowledged now, two years after its completion.

I was able to download the report. FYI, as I'm sure you know, the report pertains to GM-38, and the correct title is "Simulation of Zones of Contribution to Wells at Site GM-38, Naval Weapons Industrial Reserve Plant, Bethpage, New York."

Subject: FW: Published USGS report Groundwater model simulations

Hi Carol and Steve,
Apparently USGS is catching up on some administrative things. Attached is a cover letter from USGS that they've published the groundwater modeling & simulation report (Northrop-Grumman/Navy) Bethpage area. They also sent a similar cover letter on the 2010 LI water levels report.

Nothing new, but you might get an inquiry.

Regards
Rob Alvey
