6/11/12 Lee Continued . . .

CH repack the week of the 17th in Oregon
to mid week of the 24th completion
OH - July 20th CH in Ohio

DOT → OR waste could be shipped
until DOT has "named it".

→ Steel to poly drums in OR

Polling samples this week. However can't ship
until DOT names it.

→ Shipping name for OH defunct due to unknown powder

(Bob Claterbuck?) w/ DOT setting pressure
from EPA V.

→ EPA V → wants someone ~~to~~ out
to watch repack

6/14 Lee → 812-2063
delay on info requested in extension ltr is OK
Low about end of June

6/

6/5/12 Continued

→ DOT concerned about shipping names of material currently in OR

→ Clean Harbors will incinerate at 100 pound charges. → ~~they~~ CH will come to OR + move the 400 pound charges to 100 pounds.

- will need a 90 day extension

→ Samples for full DOT gamit going out today to lab.

4.1 Flamable solid

4.2 Spontaneous combustible solid

→ DOT saying don't ship anything (PA, OH, OR) until DOT gets back w/ a shipping name.

- Packaging is the same, no matter the shipping name.

Z: Swarf in OR has been tested prior by EPA.

Call today w/ EPA on plan, should be done.

6/11 1:44 lee LMM

Lee EPA V Clean Harbors wants Wah Chang OR business, if they take WTI waste.

- Clean Harbors is in the driver seat.

5/22/11 Lee Continued . . .

- DOT may require sampling prior to transport, if that is the case Safety Plan will need to be redone + WTI will have to agree.
- CWM upper management business decision.

ESI in Idaho or Clean Harbors LF

UXB - Explosive Contractor about opening + sampling drums, looking for powder
- Nothing under 53 micron. DOT threshold for powder.

OR Drums - Clean Harbor - have been incinerating ~~[illegible]~~ them for 15 years
30 gallon 400 pound
Clean Harbor 100 pound →
break down

6/1/12 Lee W. 541 812 - 7063 LMM 2:05
5:20 Lee & LM
6/5/12 ILM for Lee
Lee - working w/ DOT on shipping names
- Zirconium Powder Dry was suggested but they (DOT) didn't like it
- EPA (Region X) work plan comments (back + forth)
- A drum may have some fire suppressant
- Clean Waste → still waiting on regional president approval
- Idaho facility developing a profile + process
- whoever accepts 1st is where it will go

5/11/12 Lee Continued
WAH Chang origin / Current waste Options
① Clean Harbors - 100 pond charges / incineration
② CWM

5/21/12 " " " " " LMM
5/22 " " ILM

5/22 Rich Duval.
- Clean Harbors will repack + fill w/ sodium silicate solution
- Clean Harbors will punch a hole in original drum to get solution in
- Chem Waste will decide Friday if they will take it
- Chem Waste working on stabilization plan
- Waste Profile indicates that the permit allows CWM to take it.
↳ Rich D. has given DEQ green light

5/23/12 Lee Weber
Clear Harbor - High Hazard Team
- Open overpak and saturate / flooded
- DOT concern over alleged powder in barrel.
↳ DOT initially wanted drum sampled
DOT 4.1 sample (?)

4/26 2:10 Lee Webber - Contract issues.
- Clean Harbors wants to K directly w/ WTI, which will be a trick
- Transport plan - mid next week

5/7 Rich D. → CWM. - ready to
They have a stabilization plan approved via the permit. If there is a deviation the permit needs to modified (Class II)

5/11 ILM for Lee 1129
5/11 1155 Lee - USDOT reviewing transportation plan. Reviewing profile to determine proper shipping hazard class.
- Safety Plan is about done. Feedback from EPA V
↳ Safety plan can't be approved until transportation plan is approved.
- Both plans need to be approved for Clean Harbors to move forward
- Hoping next week approval of plans is the hope
- ATI would hire someone to open drums to grab a sample (↳ Explosives expert)
- WTI thinks they may have been powder at the bottom of the drum.

Susan

4/23/12 - Contingency Plan, "Wide Load"; Travel when traffic is light.
- Robotics or x-rays on drums vs. having humans open the overpak.

- Susan says that WTI would not take generator

F/U w/ Michelle
- WTI Report
- Let us know if waste is moving
- Let him know, it does not appear on initial review that we can compel ATSI to remove drums

~~[illegible]~~

4/26 800 Mtg/call WTI, Veolia, EPA IV, Ohio EPA
Lee Weber today - Ready need approval at Arlington
LMM

9:39 Lee W. ILM
Permit
Rich - Clean Waste can store it for 11 months
to refine treatment plan
modification of stabilization plan
OR
S4 by itself - Storage unit
- Jeff Buxton going to OR/Work Clay
