"Jennifer" in CID. I have no idea where she's located or what compounds she wants. The request I got, second hand, was "a list of chemicals CID would like the Chemours samples to be tested for".

Really vague, as most requests are as they float through management.

Who did the request come from. That's my poster.

Mark

Hi Mark,

We've just gotten a request for analysis of previously collected samples; they gave us the attached slide w/o any specifics. I'm being asked my thoughts on all this. I *think* they want the "Measured by LC/MS" subset, but don't know at this point.

How many of the compounds on that slide are you able to get standards for?

Thanks,

Scott
