DISCUSSION:

I called Mr. O'Brien regarding access for a PA at the Fairless Hills USX facility. Mr. O'Brien stated that he believed that EPA, or EPA contractors had already performed similar work on the site. His Region III RCRA contact is Jeff Barnett. The latest assessment was performed by Geoscience Consultants of Silver Springs, MD, under EPA # 260. Also, he stated that the FH area WF-3, containing ammonia still sludges, had been cleaned up to EPA's + LER's satisfaction in 1982 or 1983.
