NUS CORPORATION AND SUBSIDIARIES 441523 **TELECON NOTE**

CONTROL NO:	DATE: 11/25/87	TIME: 8:30

DISTRIBUTION:

USS Fairless Hills F3-8710-32

BETWEEN:	OF:	PHONE:
Jim O'Brien	USS Fairless	(215) 736-4217

AND: Randy Patarcity

DISCUSSION:

I contacted Mr. O'Brien regarding the drinking water sources for the facility. He stated that originally, (1951), the plant had 3 radial wells on the property's eastern edge. In ~~195~~ the late 1950's, wells A + B were eliminated, a C extended into a water intake on the river. The plant maintains its own treatment system. The plant operates a ~~Serva~~ service water intake at its southern point. This has eight settling basins which are for primary clarification. The service water intake can be used as an emergency source for the potable water system.

ACTION ITEMS:
