Dear Keith,

I would like to propose that find a mechanism to involve the public in the perchlorate issue. Since the problem hasn't neatly fallen into any particular program perhaps you would like to take the lead on this. Some sort of Working Group structure may be enough for now.

Can we talk about this next week sometime? There are already four groups (NGO's) fairly well involved at this point, but I expect this to increase steadily.

Hope all is well with you.

Cordially,
Jane Williams
