Denver, CO 80202-1129

April 26th, 2018

Dear Ms. Morales,

This letter is intended to satisfy the monitoring data subject to certification for State and Local Air Monitoring Stations (SLAMS) that meet criteria in 40 CFR 58 Appendix A from January 1, 2017 through December 31, 2017. This letter also serves to recertify the NO_2 data for site 08-031-0028 to which some minor changes were made after the 2016 data certification was completed. The ambient concentration data and the quality assurance data are completely submitted to Air Quality System (AQS) by Primary Quality Assurance Organization (PQAO) 0240, Colorado Department of Public Health and Environment (CDPHE), Air Pollution Control Division (APCD), with the exception of $PM_{2.5}$ speciation data.

Enclosed please find the following documentation:

- AMP600 (Certification Evaluation and Concurrence Report for Criteria Pollutants) shows CO, NO_2, SO_2 (hourly), O_3, and FRM/FEM data for both PM_{10}, and $PM_{2.5}$ to be complete and quality assured as prescribed for the 2017 Annual Data Certification Process.
- AMP600 for site 08-031-0028 for 2016, so NO_2 (42602) data to be recertified as some minor modifications were made to that data after the 2016 Data Certification process was completed.
- AMP450NC for both hourly (42401) and 5-minute (42406) SO_2.
- AMP450NC for $PM_{10-2.5}$.

As the Quality Assurance Officer for the Colorado Air Pollution Control Division's, Technical Services Program, I have reviewed the ambient data and the quality assurance data in the AQS database and find it to be of satisfactory quality. Therefore, I certify that to the best of my knowledge, it presents an accurate reflection of the 2017 data, taking into consideration the quality assurance findings. If you have any questions, please contact Gordon Pierce at 303-692-3238.

Sincerely,

Cindy K Wike

Cindy K Wike, QA Officer
