FYI. Just got off the phone with Brian Storey and Keith Barnett. They are going to scan the compliance extension requests and send them over, but want a meeting with us before we do anything to let them know how we intend to proceed (they are expecting blowback if OECA decides anything other than immediate approval). They said they now have requests for 17 facilities with about 2 that are asking for more time to install controls and 15 that are asking for more time to become area sources (presumably under the new non-OIAI policy).

Sara,

Thanks for reaching out. Once you receive the requests from Brian, you will need to quickly set up a meeting with the relevant parties – AED, OGC, the impacted regions.

Brian,

Can you scan over the requests you've received, since we are currently on the 30 day clock to respond? Thanks.

I think the total is up to 15 facilities

Brian,

Did you hear anything about any extension requests yet, now that the deadline has passed? Thanks.

Attached is a copy of the fact sheet that went out as part of the 2015 rulemaking. Take a look and let me know if there is any additional information you would need. I am looking for something regarding the recent court decision, although I don't think anything exists as of yet.

Brian,

In prepping for my briefing this afternoon, do you have any background documents available on the Brick MACT changes in 2015 or anything from OGC summarizing the various cases up to this point? Thanks for any help you can provide.
