Subject: Discuss Potential Refinery MACT Inspector Training
Location: **Private Phone/Ex. 6**
Start: 6/13/2018 2:00:00 PM
End: 6/13/2018 3:00:00 PM
Show Time As: Busy

Hi Folks,
This is an opportunity to meet with April from LA DEQ. She has some ideas for developing inspector training for the Refinery MACT.

Subject: RMACT class creation

Marcia,

I spoke to you a couple of weeks ago at the EPA Region 6 Air conference about the creation of a RMACT class. The last two emails in the attached train are the suggestions to Jim Gold (EPA) from Louisiana and Texas about Subparts MACT CC, UUU and OOOOa training guidance. If a class could be created to cover these topics, it would be beneficial to our state inspectors. I appreciate all of your efforts in the matter. If I need to provide more information or clarification, please let me know.

Sincerely,

From: April Baiamonte

Subject: Re: Regulatory updates presentation

In the planning phase, I mentioned adding a regualtion update section with RSR in mind. I sent an email to Jim earlier in the day requesting information on the same set of regulations. (Didn't reply all). The presentation could also include information about an overview of the new requirements for each unit/part- Coker units, fenceline monitoring, flares, SSM, and relief valves.

My second suggestion was for subpart OOOOa. Again, an overview or recap of the additions to the regulations would be beneficial.

Subject: RE: Regulatory updates presentation

I have a suggestion to extend the "Regulatory Update" portion, since it sounds like we need to make the most of the speakers time . The RTR for petroleum refineries and new benzene fenceline monitoring requirements (MACT Subpart CC and Subpart UUU) is a current hot topic and only going to gain attention and scrutiny once data is accessible by the public. Some talking points for this could be:

- EPA's expected response on data from affected facilities and the public's subsequent response once data goes live
- EPA's expectation of the States in regards to implementation once the data goes live
- Update on the database where information will be stored (what access States will have versus the public)
- Maybe a "sneak peak" of the database if one exist
- Recent developments that may have occurred since the monitoring requirement went in to effect
- Amount of refineries that have requested and received extension requests and amount that have been denied and reasons why both occurred

Thanks,

Mike Miller

The presenter is coming all the way from D.C. I think we should give her more than half an hour. I'll talk with her and see if she's willing to do 45 minutes.

If we're struggling to find updates in here, could we bump this to a 30 minute presentation and shave off the 30 minutes at the end of the morning so that we're not ending at 12:30?

Yall,

Could you provide some input as to what kind of things should be included in the "Regulatory Update" on the last day of the workshop? There is the once in always in changes, but that's not much to talk about, and there's an ethylene rule change.

Anything else?

Jim Gold
