Hi Cindy and Yasmeen: Please see trailing messages. Judy Smith with the Oregon Operations Office of EPA would be a good contact for communications and outreach with respect to the moss sampling study.

Best,

Borys

Teresa: Thank you for your quick response. I appreciate the contacts you provided and the background on contacts with Geoff Donovan, our lead scientist on this study. As this is a rapidly developing issue, I think it's important for us to communicate at the various levels in our respective organizations. I will follow up with Katie and will put Judy in touch with our communications

specialists.
Best,
Borys

Hi Borys,

Following up on our conversation at SMG this morning about air toxics, a good connection at EPA is Katie McClintock (copied on this message). She is familiar with the issues and all of the players at EPA and is generally serving as our point of contact on issues evolving out of the air toxics research.

I also wanted to note, however, that Geoff Donovan recently made contact with Judy Smith (a communications and outreach specialist in our Oregon Operations Office) and she connected him by email with a few of our researchers. I am including her email below so you can see what coordination has already taken place.

Best regards,

Teresa

Hi Geoff –

This e-mail is to follow up on our conversation about your soon to be published moss study and who at our agency would be a potential contact for a discussion about next steps in information gathering, potentially a collaborative effort between EPA and the Forest Service to see if there is a way to calibrate your bio-monitoring with air monitoring data. (Sorry that's not very accurate or eloquent as I multitask).

The following three people were suggested. I've copied them on this e-mail, not knowing if they are aware of recent air toxics developments here in Portland, Oregon.

Tim Watkins	Watkins.tim@epa.gov	919-541-5114
Chet Wayland	wayland.richard@epa.gov	919-541-4603
Dixon Landers	landers.dixon@epa.gov	541-754-4427

Here is the link to the Oregon Department of Environmental Quality Website that provides some background: http://www.deq.state.or.us/nwr/metalsemissions.htm
