Thanks, Judy. I've talked to her, but need to follow up – when I confirm the answer.
Hope you and Paul are doing well.
J

Subject: Keely Chalmers KGW looking for information back from DEQ /OHA

Keely is on deadline to do a story Her cell is 503-830-4983. I directed her to the DEQ and OHA websites, but she was hoping to talk with someone about:

Does cadmium and arsenic accumulate in soil?
Is this a hazard that people should be concerned about?
If so, how would you test for it and how would you get rid of it?

I told her that my understanding was that DEQ had a soil sampling plan in the works and that OHA had tips about safe gardening and other precautionary things to protect yourself from contamination.

Thanks,
Judy
