Subject: Proposing media availability Thurs. RE: JIC-SE Portland Metals
Date: Thursday, March 03, 2016 2:53:47 PM

All,
We anticipate releasing soil data Wed. It is with OHA now; it will be reviewed by JIC along with messages in the form of web content, FAQs, and explanation of conclusions with a joint news release will need to go out of course.
Also, Thurs is the target date for glass company agreement to be signed.
Given these two big announcements, let's talk about scheduling an hour-long media availability on Thurs (two for one) with DEQ tech staff (perhaps Keith Johnson on soil and Leah Feldon on legal and rulemaking) along with public health, toxicology experts.
Please think about it and weigh in.
