Dr. Bush—

- Got the SAS reports up and are starting to walk through it. Biggest area is around people with profound disabilities. It confirms what we knew as far as cost outliers. They are at MRSI so we need to do further investigation.
- Received the first report of the OSCR report from WyHealth. It was a disappointing report so the expectations we are missing will be addressed. It needs to be a final report and is not. The legal issues need to be considered as well, and this report is not sufficient.
- Connected with CU telehealth coordinator. My previous contact had left so I have finally determined who the replacement is.
- Slowly rewriting the next RFP.
- Albany and Sweetwater Counties are going forward with baby showers on the same day. In order for us to provide the gift cards, we need to make sure that the programs are covered: eligibility, WyHealth, Pregnant by Choice. PHN's will cover. The maternal child programs need to be covered by whomever they determine. Sheila may go to one to cover, and need to talk to Sheree about covering her program.

Jan—

- Continuing down the path of re-procurement to replace NG as the vendor for WES and the CSC. Business cases are at ETS for review. Met with DFS for their procurement and will probably delay and wait until we have our new vendor determined.
- Pest issue in the CSC. Bedbugs were found in the call center. Jerry Moberly and an exterminator located the bedbugs in the chair. The CSC, conference room and interview rooms in 259C were sprayed and traps were placed and in checking them, there has been no further activity.
- Accepting credit card payments by Xerox. Elavon is current vendor in Vital Records and Child Support Enforcement. No one has anything good to say about them. Ron contacted Game and Fish and they have a new vendor. Ron will get further information on the vendor from Game and Fish.
