Jonathan:

I am still awaiting the update on status of the activities listed in the email below. I expected to get this by close of business on September 7 which you committed to providing. Again, you fail to communicate and provide the information requested or even part of the information requested.

I need this information immediately.

Thanks
Gary Moore

Subject: Falcon Refinery (aka Ingleside Refinery) - URGENT

Jonathan:

Based upon on conversations on September 4, you will send me an update on the status of the following activities by close of business on September 7, 2018.

1. Tank 7: Disposal of waste placed in roll-off boxes
    a. Exact Date scheduled with U.S. Ecology
    b. Notification when this happens.

2. Tank 12 (Moved from T13): Treat/dispose of oily water and remove/dispose of any accumulated tank bottoms

3. Refinery Piping/Equipment Evaluation/Removal: Evaluate/Remove/Dispose of waste within piping and equipment

4. Asbestos Evaluation/Removal: Evaluate/Remove/Dispose of Asbestos Containing materials

5. Final Report Plan: Begin preparation of final report for removal action including all information from 2003 to completion.

Good afternoon Tommy,

We received confirmation this morning from Scott on the below dates and times. Please keep in mind that right now, today, we are already booked for all thermal availability into Sept. In three weeks from now it could be Oct or Nov. Because there is such a demand for thermal slots right now, we are going to need a deposit in advance and payment in advance.

Tommy, I need to get a commitment that you will agree to the below **by the end of this week** or we have to reschedule for the next available spots. And if we have to reschedule, the below requirements will still be required for any loads that need to go to thermal. After this week, I will be out of the office until July 11th. The below dates are critical to give time behind the scenes to confirm payments and logistics.

If any of the dates are not followed we will have to cancel the spots and reschedule.

1) We will need by COB 06/25/18 – a deposit of $20,000.
2) Once we have received the above, we will need another $35,000 by COB 07/06/18.

Monday, 7/16 and Wednesday, 7/18 at 11am
Monday, 7/23 and Wednesday, 7/25 at 11am
Monday, 7/30 and Wednesday, 8/1 at 11am

Thanks,

Christopher Laney

Chris / Tommy,

I am following up on this. We have tentative dates on the schedule for this material that have not been given to Scott, pending receipt of payment requested. I need to know if monies have been received and the plan is still

to ship the materials to US Ecology Texas or I should cancel the slots so they can be utilized by another generator.

Please provide an update.

Thank you,
Glenda

Hi Tommy,

I just wanted to pass along that Scott reached out to Glenda on Monday. It appears that the K169 Sludge material may need to be sent to our Robstown site sometime, maybe in the coming weeks. Glenda came up with an estimate amount below. That was also back in April, so figures/totals may have changed some. I wanted to make you aware as we will need payment in advance of the material being scheduled.

Thanks,

Christopher Laney

Subject: RE: Ingleside Sample

Scott,

If this is K169 Sludge, unprocessed (cut and centrifuged), the cost will be $650.00 per ton plus 10% EIR Fee.

- Materials have to be free of all metal and debris because materials are auger fed into the Thermal Desorption Unit. If debris has to be removed and processed separately, that will also be at $0.50 per pound with a one ton minimum.
- Materials must dump by gravity feed to RCRA Empty. If containers aren't RCRA Empty from dumping, a scrape out will be required. That cost is $250.00 per load.

Currently, we are booked on the thermal desorption unit through June, so the earliest we can accept the loads would be July. I will have to work with Corporate to get payment on the account to cover the loads before they can be scheduled.

Below are my estimates, assuming 17 tons per load, waste contains no metal or debris and each load requires a scrape out (to be on the safe side).

	Quantity	Rate	Total
Disposal	17	$650.00	$11,050.00

10% EIR Fee	$11,050.00	10%	$1,105.00
Total Disposal per load			$12,155.00
Total Disposal 6 loads		**6**	**$72,930.00**
Scrape Out	6	$250.00	$1,500.00
Total Disposal with Scrape Outs			**$74,430.00**

Let me know if that's the route you want to go and I can get Corporate working out the pre-payment details.

Thank you,
Glenda

Scott,

What is the materials? Crude Oil Tank Bottoms, contaminated soil, etc?

Hazardous or non-hazardous? Most of what has came off that site has been crude oil tank bottoms and was listed hazardous waste (K169).

Subject: FW: Ingleside Sample

Hi Tommy,

I just wanted to pass along that Scott reached out to Glenda on Monday. It appears that the K169 Sludge material may need to be sent to our Robstown site sometime, maybe in the coming weeks. Glenda came up with an estimate amount below. That was also back in April, so figures/totals may have changed some. I wanted to make you aware as we will need payment in advance of the material being scheduled.

Thanks,

Christopher Laney

Morning,

Can you let me know what we need to do to get on the schedule for disposal for the earliest date as possible?

I do the analysis completed.

Scott

Scott,

If this is K169 Sludge, unprocessed (cut and centrifuged), the cost will be $650.00 per ton plus 10% EIR Fee.

- Materials have to be free of all metal and debris because materials are auger fed into the Thermal Desorption Unit. If debris has to be removed and processed separately, that will also be at $0.50 per pound with a one ton minimum.
- Materials must dump by gravity feed to RCRA Empty. If containers aren't RCRA Empty from dumping, a scrape out will be required. That cost is $250.00 per load.

Currently, we are booked on the thermal desorption unit through June, so the earliest we can accept the loads would be July. I will have to work with Corporate to get payment on the account to cover the loads before they can be scheduled.

Below are my estimates, assuming 17 tons per load, waste contains no metal or debris and each load requires a scrape out (to be on the safe side).

	Quantity	Rate	Total
Disposal	17	$650.00	$11,050.00
10% EIR Fee	$11,050.00	10%	$1,105.00
Total Disposal per load			$12,155.00
Total Disposal 6 loads		**6**	**$72,930.00**
Scrape Out	6	$250.00	$1,500.00
Total Disposal with Scrape Outs			**$74,430.00**

Let me know if that's the route you want to go and I can get Corporate working out the pre-payment details.

Thank you,
Glenda

The material should be tank bottoms and hazardous.

Scott,

What is the materials? Crude Oil Tank Bottoms, contaminated soil, etc?

Hazardous or non-hazardous? Most of what has came off that site has been crude oil tank bottoms and was listed hazardous waste (K169).

Thanks,
Glenda

Just wanted to let you know that I will be sending sample results to you on Friday for a quote for removal for 7 rolloffs.

I need to have the quote for disposal on Friday, if possible.

Thanks for all the help,
Scott
