Subject: Craft Turney WSC Update

Hello David,
The only update for this afternoon is that ISK Biocides in Memphis, TN has graciously agreed to ship a 100 gram sample of 99% technical material (MBT, with a Certificate of Analysis) to the Houston lab this evening. Several attempts to locate a more local source of MBT proved unsuccessful. We are told by ISK the sample will arrive on Monday, and asked that they send us the tracking information when they receive it at the time of package pick up this evening. Wes will have someone at the Lab on Monday to receive the sample and begin work.

I reached out to Cari-Michel LaCaille of TCEQs drinking water division this afternoon to communicate this development and timeline, and she is appreciative of our efforts. She will keep me informed of any developments over the weekend, which I will pass along to the team. Kim will be assisting me with this effort.
Thank you.
Jim
