Johnson helped with the standard. Other than that I don't believe so. It was Lisa, Diane and you.

Did anyone outside our group help with extractions or glassware?

Rick

- Researched 3 different extraction methods
- Procured materials in Lisa's absence (for extraction and for Johnson)
- Made MBT standards used for analysis
- Performed multiple tests for interference and viability
    - Adsorption Test - occurred over 3 days with different containers
    - Chlorine Tests
    - Acid/Neutral Test
- Performed a DOC on decided extraction method
- Extracted all 35 samples plus QC in one day
- Came in on the Columbus Day holiday.

Rick was the point man, researched methods and found where to procure the MBT.
Diane helped with method development and technical genius.

Lisa helped me in the lab with the extraction and testing processes as well as doing procurement. Meredith and David setup the analysis method and analyzed all the samples.

Truly a team effort and made the process go as smooth as it did! Yay team!

Please let me know if you did any work on Craft Turney and what the nature of the work was. Plus, let me know if anyone outside our section or in our section and not here this week worked on it that you know of.
