These spreadsheets show the entire Title V universe.

On the 2016 sheet, the yellow highlighted rows show the Title V permits that were reissued in 2016 (at the bottom of the top section); the green highlighed rows are the additional Title V permits that were issued (those that were not part of the backlog). Go all the way to the bottom of the sheet to see the backlog at year end.

The 2017 tab shows similar information. The yellow highlighted items near the top of the top section indicate permits we think can be issued in 2017; the yellow highlighted items at the bottom of the top section indicate backlogged permits that were issued, while green highlighed items indicate additional (non backlogged) Title V permits that were issued. At the bottom of the sheet, you can find the expected backlog at year end, given the number of permits that will expire and the number we hope to issue.
