Hi George,
Thanks for the update. Here is another data set for the sampling results that came in today. The tab labeled "Sheet 1", contains all the data collected to date. The tab labeled "Waneta sampling location" contains data for the same location. I am also attaching the wind rose that I received today. Have a great weekend!

Diane

Hi Diane - thanks for the additional info. As to the R5 USEPA May 2018 Middletown monitoring data, my understanding is that it's still being developed/finalized and is likely to be available next week. thanks, George B.

Good Morning George,

Here is the updated Middletown spreadsheet to reflect the sampling results that we received yesterday from Hamilton county Division of Environmental Services. I am also attaching copies of the laboratory data sheets.

Ohio EPA is still waiting for U.S. EPA to respond to our request for copies of U.S. EPA's air monitoring data for the Middletown sampling that was conducted last month. Let me know if you have any information or questions.

Thanks,

Diane B. McClure

Hi George,
Thanks again for your previous message regarding A.K. Steel. Attached is a spreadsheet summary of the data that Ohio EPA received from Hamilton County Division of Environmental Services. I also understand that U.S.EPA Region 5 collected 24hr VOC canister samples on two separate occasions. If you receive information regarding U.S.EPA's canister results, please share at your earliest convenience. Have a great weekend.
