Subject: AK Steel update

Update on AK Steel Middletown

Ohio called to say that they are soon sending an interim Order. The Order will instruct AK Steel to:

Perform 14 days of Summa testing and submit results
Perform any immediate action to reduce benzene emissions
Comply with leaking door rule
Ensure subpart FF, BWON Initial Notice of Compliance contains the tar decanter
Install digital cameras for viewing coke oven
Revise O&M plan
Hire third party consultant to ensure title V compliance

They will not mention nuisance or health. Ohio will consider sending another Order for additional measures if needed.
