Anaconda Regional Water, Waste &... has been changed

Jenkins, Laura Flynn
5/2/2019 1:26 PM

Title Anaconda Regional Water, Waste & Soils Operable Unit

Lead Division SEMD

Assigned To Smidinger, Betsy; Stavnes, Sandra

Brief Description The Anaconda Smelter Superfund Site is located in southwestern Montana, near Anaconda. Milling and smelting activities conducted in the Anaconda area for nearly 100 years resulted in the contamination of soils, surface water, and ground water in the surrounding area, primarily through airborne emissions and disposal practices from smelting operations. A revised Proposed Plan for a Record of Decision (ROD) amendment has been developed to identify changes to the remedy at the Anaconda Regional Water, Waste & Soils Operable Unit (ARWWS OU) (part of the larger Anaconda Smelter Co. NPL Site). These changes are needed to complete the surface water portion of the remedy.
