2:00 PM today would be 12:00 noon in Vegas. The key person who needs to be on the call is on the beaches of Maryland. Give me a couple and I'll let you know what happens.

Erik had to make a side trip to look at an oil well this morning. I believe he said he was going to be available after 2 CST.

**** External Email ****
Good morning gents and sounds like a great idea! I have included the folks from our Las Vegas lab since they know more about the equipment than I.

Shall we make this happen today or tomorrow? Let's see what the LV folks come back with.

Thanks and more to follow.

Subject: Lowerline Scanning Next Week

George,

Would you like to have a call to discuss plans to conduct the scanning in the Lowerline area next week? Erik and I spoke a little this morning and I wanted to offer our assistance in mechanizing things if possible. We have an ATV that can be used. Has 2" receiver hitches front and back as well as baskets. We could mount bars to hold an array if that would work for you all. Just need a couple of specs. Also have a hitch mounted basket for a vehicle that can be used to hold an array also. We can fabricate the mounts as long as we know the detector diameters. Used a similar system in NM for the AUM assessments and it worked well.

Thanks
David
