John,

Thanks for your time today. Attached is the back up info that we sent to DOE this morning. Look forward to talking to you this afternoon at 3:30 p.m.

EMAIL FROM EXTERNAL SENDER

The City of New Orleans may qualify for reimbursement funds if complete their actions to address the radioactive site. But I believe that there is a $25,000 maximum limit. I don't have enough information to determine if this Local

Government Reimbursement applies or not. Whether the LGR applies to this particular situation of not, it may prove to be a useful program for other hazardous substance cleanups that the City undertakes; i.e. fire department.

https://www.epa.gov/emergency-response/local-governments-reimbursement-program

Or the radiation site may meet the criteria per the National Contingency Plan for our program, the EPA Superfund Removal Program, to assist or complete the project. Please provide some additional information regarding the radiation (location, surroundings, type of radiation, volume, actions to date, current status of site, etc.) so we could evaluate options to assist the City of New Orleans with this Site.

Thank you, jjm
