Here's a presentation that the City did. The story is good but I'm not believing all the readings, it looks like they have confused some units.

Subject: Do you want to get involved?

Do you want to get involved with a site in NOLA? Radiation in the middle of a residential street. NOLA tried to clean it up but discovered it was more than they thought. No PRP that we can tell right now. Residential property all along the street. A day care nearby. It should me a fairly short term thing.
