Subject: RE: Investigation Work Plan Proposal for 009/010 and 001 at ArcelorMittal Indiana Harbor West

Mr. Barnett-

EPA is in agreement with ArcelorMittal's conceptual approach. EPA desires to formalize the process by entering into these plans through an Administrative Order on Consent (AOC) pursuant to Section 311 of the Clean Water Act (CWA). The AOC with the EPA would specifically address Outfall 001 and areas south of the 4 rail bridges that run through the ArcelorMittal property and across the Indiana Harbor Ship Canal. In the interim, EPA encourages ArcelorMittal to proceed with preparing a draft work plan and Quality Assurance Project Plan (QAPP) for EPA's review and comment.

At this time, any plans regarding Outfalls 009 and 010 and areas north of the rail bridge should be addressed with the United States Coast Guard. Please note that both agencies are in communication with one another regarding Outfalls 001, 009, and 010.

I am in receipt of your request for EPA's data. Could you please be more specific as to what data you are looking for? Please note that before releasing any documents to ArcelorMittal, I will have to run it past my legal team. I do not believe I will be permitted to release the entire file, so if you are more specific to your requests, I can try to get those materials to you without asking you to make a formal Freedom of Information Act (FOIA) request. I will do my best to get it to you in the shortest time frame possible, but I cannot make any commitment to deliver it within the 10-day time period you have requested. I will notify you if you will need to file a formal FOIA request to get the information.

Mike Beslow
