Hi Issac,
I'm not familiar with the EFH folks down in our southeast region, however Janine and Terra are part of the EFH team here in HQ.

Janine/Terra, can you help Issac?

Thanks,
Kellie

Kellie,

EPA and LDEQ will jointly issue a permit which authorizes LOOP to discharge to inland water, LA territorial sea and the GOM. EPA is responsible for once-thru-cooling water and deck drainage discharges to the GOM. EPA determines that the permitting action will not adversely affect essential fish habitat in the GOM and will send a letter to NFMS/NOAA to seek concurrence from NFMS. Do you have the regional NFMS contact on this concurrence matter? Thanks.

Isaac Chen
