Project No. 10-0-3231

Ms. Mary Jane Norville
King & Spaulding
2500 Trust Company Tower
Atlanta, Georgia 30303

Dear Ms. Norville:

Enclosed herewith, you will find a copy of the waste sample analysis results for specimens collected from the SAAD Trousdale Road Site, Nashville, Tennessee. In addition, I have included information regarding wastes that were inventoried during the sample collection activities and pertinent data regarding waste disposal alternatives and subsequent costs.

At your earliest convenience, I would like to meet with you to discuss the mindset of the PRP Group regarding disposal alternatives, costs, and the subsequent schedule to executing and completing this phase of the project.

Sincerely,

James A. Graham
Project Manager

Enclosure

The following summarizes data collected at, or relative to, bulk waste liquids at the SAAD Trousdale Road Site, located at 3655 Trousdale Road, Davidson County, Nashville, Tennessee.

On March 8, 1990, ENSITE personnel collected a total of eleven waste samples from six above-ground and two below-ground storage tanks located at the site. These samples were shipped, under chain-of -custody procedures, to EcoTek Laboratory Systems, Inc. (EcoTek) of Atlanta, Georgia for chemical and physical analysis. Waste streams identifying the same characteristics were composite in the laboratory and analyzed for specific parameters required for waste reclamation and/or disposal profiling.

A total of four separate waste streams were composited and analyzed separately. Three of the waste streams- solvents, sludge and oil- were analyzed for: oil and grease; percent water; percent ash; total sulfur; PCB's; total residual chlorine; flashpoint; pH; density; BTU; and the F001 through F005 series compounds. A priority pollutant analysis was performed on the fourth sample, a water phase.

Sampling activities and site reconnaissance initiated at the site also provided information regarding the various waste types and estimated quantities found in the tanks. This information is summarized in TABLE 1. TABLE 2 presents pricing information with regard to disposal facilities that, from a regulatory permit status and geographical location present a disposal alternative for wastes at the site. In TABLE 3, this data is further extended to present a cost estimate for disposal of the various waste streams at each respective facility.
