This meeting is to generally update Monica on our progress and also to discuss how to approach a call with ND regarding a request for an extension and to suggest ND put additional effort into their RTCs. I made DJ optional since he is out on Friday.

Attached are the incoming letter, options paper, a similar recently issued Ameresco response letter, and current draft of a short Coyote response letter.

HQ has requested review of the draft response letter (through at least first line managers) by **COB, Monday 10/29.**

Here is the link to the Sharepoint version of the ND response letter in progress (copy attached as it stands 10/25 afternoon):
