Brent,

Nothing actually. I couldn't find the letter we sent to NFMS for concurrence of no adverse impact on essential fish habitat when we issued the OCS or TxTS GP. We might have done that through emails. I decided not to leave statements for ODCE and ESA as is. We also need to delete the ESA consultation language in Part II of the draft permit as you commented.

Isaac:

What are the holdup issues?

Subject: Wrapping up Loop

Folks

On our call with LDEQ this week I promised Scott that we would wrap our comments on Loop by the end of next week (5/23). I understand we're still looking at Coastal Zone Management Act, NMFS, public notice issues related to EPA's portion of the permit and Cormix model run assistance.

Brent, let me know what holdup we have on your issues.

Taim, were you able to talk with LDEQ staff and assess the scope and timeframe for the work needed?

Thanks.

Claudia V. Hosch
