Team,
Latest report from the crew is that the cloud ceiling has risen slightly. In the event of a reignition data could be collected with the ability to scan for chemical species but imagery products would be marginal. The recommendation is to cancel the regular flight for the day and keep the crew at the ready if a critical need arises.

Team,
Weather conditions still not good for collection. The estimate is that there is still a chance for clearing around 1:00 pm. We will evaluate flight potential again at 12:30 pm.

Subject: ASPECT Update 1 -- 29 March 2019

Team,

Weather in the Deer Park area is not favorable for good data collection this morning. The forecast is for it to clear early afternoon. We will evaluate the conditions at 11:00 am and estimate if and when a good data collection flight can be conducted.
