Thanks George! I agree that particle size is definitely a worthwhile discuss that should occur sooner rather than later.

Hi Jillian,

This is just to share an open access paper that I thought may be useful in our future discussions on particle size. It explains the biological basis for selecting the 5 mm "threshold". I found the "guiding principles for formulating a definition/categorization framework" useful. You and Micka should decide whether or not to share it with the rest of the group.

Thanks,
George

Good afternoon Everyone!

And happy holidays, happy New Year, and hello to February. I'm so, so sorry for not getting you these notes from our meeting on 12/19 sooner. With the holidays and then the government shutdown, we didn't have much time to finalize these. Please let me know what you think and if I missed anything.

On the call, we discussed setting up a regular monthly conference call to discuss our research, thoughts, and next steps. Please let me know if any of these are good options or if you have another suggestion.

- The first Wednesday of every month at 11 a.m.
- The first Tuesday of every month at 11 a.m.
- The second Wednesday of every month at 11 a.m.
- The last Monday of every month at 1 p.m.

Feel free to give me a call with any thoughts on the notes or if you've had time as a group to discuss your thoughts on the endpoint, baseline load, etc.

Thank you so much,

Jillian Adair
