Silvia,

Found the original comments that Isaac provided on the LOOP permit regarding including of WET testing. Also attached is the revised permit that LDEQ provided incorporating biomonitoring. Subsequently, LDEQ & facility have protest inclusion of testing and wish to remove.

My question for you is can you look at the permit and associated testing requirements and provide your suggestion whether that is the proper testing to perform.

If so or based on your revised recommendation, please initiate lab communication with the Houston Lab on the tests we are intending to propose. Official word to Lab would need to come from Stacey to Wes McQuiddy, but I think it would be beneficial to stay in touch with them on our intentions.

Thanks!

Paul Kaspar
