Subject: Salient review for Ev - Anacostia Trash

First, thank you Jillian and Jen for providing edits and input on the Anacostia Trash Salient. Ev, below is a salient for your review before COB Monday. Thanks.

Federal Register Notice Published Soliciting Data for Trash in the Anacostia River Watershed.
On August 24, 2018, EPA published a notice in the Federal Register soliciting data and information from the public on debris, floatables, and/or trash in the Anacostia River watershed for use in the development of a total maximum daily load (TMDL). On March 30, 2018, Judge John D. Bates (D.D.C) vacated EPA's 2010 approval of a TMDL for trash in the Anacostia River, developed jointly by Maryland and the District of Columbia. The existing TMDL remains in effect until EPA approves or develops a replacement TMDL. EPA will revise the trash TMDL in coordination with the District of Columbia Department of Energy and the Environment (DOEE) and the Maryland Department of the Environment (MDE). In addition to the Federal Register notice, EPA Region 3, DOEE and MDE advertised the data solicitation on their respective websites. Data will be accepted until October 23, 2018, and all relevant data and information received will be considered when developing the revised TMDL. **Jillian Adair (215) 814-5713; Jon Markovich (215) 814-5784; Jennifer Sincock (215) 814-5766; Stefania Shamet (ORC) (215) 814-2682.**
