Claudia,

Not sure if you've mentioned any topics to Bill in advance of his "meet and greet" with Tegan Treadaway tomorrow, but if you would like to pass along, below are a few topics that he might consider discussing in regard to NPDES Oversight.

1) Permit concerns

- Ongoing discussions regarding removal of Total Residual Chlorine requirements at POTWs/domestic wastewater facilities.

- WET reasonable potential determinations and use of best professional judgment (BPJ) when 1 or 2 test failures exist.

- As previously discussed during nutrient profile effort, State permits include limited requirements regarding nutrient controls.

2) Public concerns

- EPA has recently been copied on public comments (Gulf Restoration Network & Tulane Law Clinic) submitted on various LPDES permits. The comment EPA receives most often includes concerns with implementation of anti-degradation procedures. Meeting may be an opportunity to ask for an update on the status of LDEQ's efforts regarding proposed Rule changes.

3) Current ongoing preliminary draft permits (PDP):

- Louisiana Offshore Oil Port (LOOP), joint LDEQ/EPA permit (potentially going to Public Notice

soon, potential issue related to biomonitoring of brine discharge outfall)

- EPA reviewing the General Permit for LA Territorial Seas Oil & Gas

- EPA reviewing the General Permit for Potable Water Treatment Plants

- EPA reviewing LDEQ's response to Interim Objection for Nucor Steel and LDEQ's proposed revisions

4) Upcoming permit coordination

- Churchhill Downs/N.O. Fairgrounds – facility pursuit of permit modification to address high bacteria discharges

More details can be provided if needed.

I have a meet-and-greet with Tegan Treadaway, the "new Sam Phillips" at LDEQ, on Aug 21. Please send me any notes on issues I may want to mention to her by Aug 20.

Thanks.

Bill
