Subject: RE: LOOP: Looking for EPA POC for the Louisiana Offshore Oil Port

LDEQ would have the lead NPDES permitting authority for onshore activity @ LOOP. Jenniffer Sheppard, LDEQ, 225-219-3197, (copied here) can likely assist or direct further, as appropriate.

Thanks,

K

Isaac Chen (214.665.7364 or chen.isaac@epa.gov) is the EPA NPDES permit writer for the offshore portion of LOOP. LDEQ is the regulatory authority for the onshore aspects.

Kay – do you know who the contact at LDEQ would be for the onshore expansion?

I'm sorry to hear of Larry's passing.

The Maritime Administration and the U.S. Coast Guard (USCG) have recently been advised that LOOP expanded its storage capacity by building additional storage tanks on the onshore portion of the facility. USCG is primarily interested in finding out the environmental impacts of the new tanks and the extent to which LOOOP coordinated with EPA and other agencies. I suspect that USCG may have additional questions.

Linden – generally, I am the regional point of contact on energy projects like LOOP. Larry Giglio was the NPDES permit writer, but he passed away about 18 months ago. What is your question and I can verify with Brent Larsen, the NPDES section chief, on who has picked up the LOOP assignment. It is probably Maria Okpala as she is handling the LNG terminals.

I'm working on an issue regarding the Louisiana Offshore Oil Port in Cameron, LA and am looking for the EPA point of contact for this port. Are either of you the right point of contact? If not, can you point me in the right direction? Thanks.
