Thanks, Kay, for the information.

Just send me the file path to the docs referred and I'll upload them to the H drive for the Admin. Record for LOOP.

Thanks so much for this information otherwise I would have been searching forever.

Thanks, Edwina – but don't forget -- the stuff that Angela Restivo (one of the previous Acting Section Chiefs) had me copy to the share drive was just the stuff I had access to from my involvement. *Lots of other folks have other information that you will need eventually.* Unfortunately, the efforts to set up a Branch record keeping process seem to have faded.

Good luck!

K

Kay, thank you so much for organizing this matter. I've posted to the share drive, not only your communications (emails) in a folder titled **Communications Internal for LOOP files from EDMS LDEQ,** but the chronology as well in the folder Background Docs (Factsheets, Timelines).

The filepath for these and other docs is as follows:

H:\6wq\6WQ-P\Administrative Record (AR) LOOP

-

This is so beneficial as LOOP, as you know, is a very "hot topic". With the docs in-house, we will not have to be "scrambling" at the last minute to respond to requestors.

As many of the folders that can be populated, would be greatly appreciated.

Thank both of you for your work in this matter.

Attached is a summary of all of the LOOP "issued" permits that I could locate via LDEQ's EDMS.

(I have all of the cited "permits" downloaded from EDMS. Some of them are already available in the "e-Admin. Record" that Edwina started on H:/wq /P. I will coordinate with Edwina to update.)

Note: Throughout my summary efforts, I found what appear to be weird typos in the permits that often went unaddressed until the next permit issuance or modification.

Also note – **ALL OUTFALLS were under EPA jurisdiction from July 22,1977 through the last EPA-only permit effective on May 12, 1990.** It took a while after LDEQ's 1996 assumption of the program before the first joint EPA/LDEQ permit became effective on February 1, 2003.

Isaac – Feel free to add what is being ***proposed*** for the next permit reissuance …which includes the most recent modification request for Outfall 029….or you might want to wait until something is issued and effective.
