Hi Jessica –

Do you have time today to talk about scope of a potential NEPA review for the LOOP deep water port? I.e., can we just look at the discharges or do we need to look at the entire operation?

I'm tied up between 1-3:30 CT today on calls but maybe we can talk before or after?

Thanks!

Tina

Subject: LOOP NEPA compliance options

Hi Tina,

I didn't include anything about EA's and EIS's in the write-up that I sent to you on Friday. Would that be helpful as well to include what our regs say about those two level of NEPA reviews in relation to the LOOP project and EPA's action associated with it?

I wasn't sure when and on what your folks were planning on briefing so I can modify the existing materials if that would be helpful as well.
