Subject: Re: PSNS Bullet Points

Perfect. Thank you.

Dino

> - Since at least 2003, the Puget Sound Naval Shipyard (PSNS) has chronically violated it's NPDES permit effluent limits as it relates to copper. Two Federal Facilities Compliance Agreements were entered in 2009 and 2013 in an attempt to achieve compliance with the permit. However, there were continued permit violations relating to the discharge of copper—355 documented violations between September 2013 and September 2018.
> - EPA Region 10 has sent a Notice of Violation to the Commanding Officer regarding the NPDES violations related to copper and a meeting is scheduled on August 20, 2019 to begin negotiations to address the violations and potentially enter into a new agreement.

- In addition to the copper exceedances, the Navy is also facing citizen suits from a community environmental group and the Suquamish tribe over the unpermitted discharge of sewage from PSNS into the Sinclair Inlet in Puget Sound. Ex. 5 DP & AC
- The Navy is also currently being sued by the State of Washington, other community groups and the Suquamish Tribe over a separate matter regarding the 2017 scraping of the hull of the ex-USS Independence, a decommissioned aircraft carrier, and the possible planned scraping of the ex-USS Kitty Hawk, a similar decommissioned aircraft carrier. The scraping of the ex-USS Independence released a significant amount of paint containing copper into Puget Sound.
