Chet-

MDNR has brought to my attention that the following Safety-Kleen facilities have submitted Part A applications. Upon further review, I have learned all but the [redacted] facility received temporary confirmation of Interim Status on August 22, 1985. This last facility probably also qualifies for Interim Status, apparently they just have an incomplete application requiring some additional process capacity information. I spoke with Jack about these facilities and he also believes they should be added to the TSF universe. I have requested MDNR maintain all [redacted] facilities in the TSF universe until such time it is determined they do not belong in this universe. Tom Judge (MDNR) indicated he thought that [redacted] and Brentwood may be closed pursuant to a RCRA approved closure plan. I requested that before they were deleted we confirm this per the usual procedure - i.e. closure inspection.

Now to my request - Tom indicated the facilities did not come up in the TSF HWDMS list we provided to him. This is true, yet the facility does get TSF flags on the administrative inventory. Does this mean we have a loophole somewhere? Is there something we can do to fix it? Please let me know what I can do to help.

Marc
